

Отчёт по лабораторной работе №7

Управление журналами событий в системе

Яковлева Дарья Сергеевна

1 октября 2025

Российский университет дружбы народов, Москва, Россия

Цель работы

Получить навыки работы с журналами мониторинга различных событий в системе.

Выполнение лабораторной работы

```
2830e __libc_start_call_main (libc.so.6 + 0x2a30e)#012#5 0x00007fd708b283c9 __libc_start_main@GLIBC_2.34 (libc.so.6 + 0x2a3c9)#012#6 0x00000000004044aa n/a (n/a + 0x0)#012ELF object binary architecture : AMD x86-64

Рис. 5: Просмотр error_log Apache

```
#  
# EnableMMAP and EnableSendfile: On systems that support it, .  
# memory-mapping or the sendfile syscall may be used to deliver  
# files. This usually improves server performance, but must  
# be turned off when serving from networked-mounted .  
# filesystems or if support for these functions is otherwise  
# broken on your system.  
# Defaults if commented: EnableMMAP On, EnableSendfile Off  
#  
#EnableMMAP off  
EnableSendfile on  
  
# Supplemental configuration  
#  
# Load config files in the "/etc/httpd/conf.d" directory, if any.  
IncludeOptional conf.d/*.conf  
ErrorLog syslog:local
```

Рис. 6: Настройка ErrorLog в httpd.conf

```
httpd.conf [----] 34 L:[ 1+ 0 1/ 1] *(34 / 34b) <EOF>  
local1.* -/var/log/httpd-error.log
```

Рис. 7: Правило rsyslog для httpd

```

Рис. 22: Активация journald

Контрольные вопросы

- Основной файл — `/etc/rsyslog.conf`
- Файлы правил — `/etc/rsyslog.d/`
- Журнал аутентификации - `/var/log/secure`

- По умолчанию — раз в неделю
- Хранение — 4 недели (`logrotate`)

- Режим реального времени: `journalctl -f`
- Сообщения PID 1 с 9:00 до 15:00:
`journalctl _PID=1 --since "09:00" --until "15:00"`
- После перезагрузки: `journalctl -b`

Итоги работы

Были приобретены навыки мониторинга системных журналов и настройки регистрации событий в Linux:

работа с `tail`, настройка `rsyslog`, использование `logger`, исследование логов при помощи `journalctl` и настройка постоянного хранения с помощью `journald`.
